Spend by Polaris

Average Transaction Values (£) by Polaris

Spend by Month

Time of Day/Day of Week

Time of day and day of week busyness from within a 60m radius of the pub calculated using GPS data

Index by Month

Seasonality of footfall from within 60m of the pub. Over 100 index indicates it is busier than average

Distance from Home

Illustrates how far those seen within 60m of the pub have travelled from their home location to get there

Polaris Plus Profile

Polaris profile of people passing within 60m of the pub, these represent the potential customers walking past the door

Category	Explanation																		
Population	The population count within the specified catchment																		
Gender	Counts of Males and Females within the specified catchment																		
Affluence	<p>Affluence is based on the disposable income level of the group relative to its age level. CACI calculates disposable income as gross income minus essential outgoings. Essential outgoings are: Tax &amp; national insurance contributions, Food &amp; clothing costs, Mortgage &amp; rents, Council tax, utilities, water &amp; structural insurance, Childcare, student loans and pensions contributions, and Travel to work costs.</p> <p><b>Low:</b> Count of population by Polaris Plus segments which are classified as Low  <b>Polaris Plus Segments:</b> 1.1, 2.1, 3.1, 4.1, 5.1</p> <p><b>Medium:</b> Count of population by Polaris Plus segments which are classified as Medium  <b>Polaris Plus Segments:</b> 1.2, 2.2, 3.2, 4.2, 5.2</p> <p><b>High:</b> Count of population by Polaris Plus segments which are classified as High  <b>Polaris Plus Segments:</b> 1.3, 2.3, 3.3, 4.3, 5.3</p>																		
Age Profile	Counts of residents by Age band																		
Economic Status (16-74)	<p>Current year estimates, CACI Up to date demographics. Number of adults aged 16-74</p> <p><b>Full-time:</b> In full-time employment</p> <p><b>Part-time:</b> In part-time employment</p> <p><b>Self employed:</b> In full-time or part-time employment, with or without employees</p> <p><b>Unemployed:</b> Unemployed, not currently working but are actively seeking</p> <p><b>Retired:</b> a person who has retired from a working or professional career</p> <p><b>Other:</b> Includes long term sick, disabled, looking after home/family</p>																		
Index vs GB Average	The index is a comparison between the target catchment area % and the GB base % for a set of variables. An index of 100 means the catchment area is in line with GB. Less than 100: there is a lower catchment area % than the GB. Greater than 100 means that you have a higher % of customers in your catchment area for that particular variable than you would expect compared to GB																		
Over GB Average	Index value is > 120																		
Around GB Average	Index value is between 80 - 120																		
Under GB Average	Index value is < 80																		
<b>Polaris Segmentation</b>																			
Polaris is Heineken's unique customer segmentation, which is based on Lifestage, Energy Levels and Demand.

<b>Licensed Premises</b>																			
The data on the map and in the table originates from CGA. They collect licensed premise data, anywhere with a liquor license, for example; hotels, sports, clubs, restaurants, pubs, etc.																			
<b>Competition Pubs</b>																			
Competition Pubs are the following HUK Segments: Craft Led, Good Pub Good Food, A Bit of Style, High Street Pub, Circuit Bar, Premium Local, Community Pub, Clubland, Family Pub Dining.																			
<b>Mobile data</b>																			
Mobile App data identifies where consumers are at specific times of day, week and year, using GPS data and gives a better understanding of which consumers are likely to be using which pubs and when. The data is measuring anyone from within a 60m radius from the pub.																			
<b>Acorn</b>																			
Acorn is a geodemographic segmentation of the UK's population. It segments households, postcodes and neighbourhoods into 6 categories, 18 groups and 62 types. By analysing significant social factors and population behaviour, it provides precise information and an in-depth understanding of the different types of people.																			
<b>Transactional data</b>																			
Consumer Spend data provides actual credit and debit card expenditure for hospitality venues allowing you to see spend and average transaction value at an pub level. The data shows who from a Polaris segmentation is spending in the pub.
