Category	Explanation																																								
Population	The population count within the specified catchment																																								
Gender	Counts of Males and Females within the specified catchment																																								
Affluence	<p>Affluence is based on the disposable income level of the group relative to its age level. CACI calculates disposable income as gross income minus essential outgoings. Essential outgoings are: Tax &amp; national insurance contributions, Food &amp; clothing costs, Mortgage &amp; rents, Council tax, utilities, water &amp; structural insurance, Childcare, student loans and pensions contributions, and Travel to work costs.</p> <p><b>Low:</b> Count of population by Polaris Plus segments which are classified as Low  <b>Polaris Plus Segments:</b> 1.1, 2.1, 3.1, 4.1</p> <p><b>Medium:</b> Count of population by Polaris Plus segments which are classified as Medium  <b>Polaris Plus Segments:</b> 1.2, 2.2, 3.2, 4.2</p> <p><b>High:</b> Count of population by Polaris Plus segments which are classified as High  <b>Polaris Plus Segments:</b> 1.3, 2.3, 3.3, 4.3</p>

Less than 100: there is a lower catchment area % than the GB. Greater than 100 means that you have a higher % of customers in your catchment area for that particular variable than you would expect compared to GB																																								
Over GB Average	Index value is > 120																																								
Around GB Average	Index value is between 80 - 120																																								
Under GB Average	Index value is < 80																																								
<b>Polaris Segmentation</b>
